DETAILED ACTION

1. Claims 1-34 are pending.

Election /Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Group I, consisting of claims 1-10 and 25-34 drawn to a method to measure cultivation parameters in a cell culture, classified under Class 435, subclass 4, for example.
 - Group II, consisting of claims 11-24 drawn to an apparatus, classified under Class 435, subclass 289.1, for example.
3. The inventions are distinct, each from the other because of the following reasons:

Invention in Group II is related to invention in Group I as a product and use thereof. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product [MPEP § 806.05(h)]. The methods of invention encompassed in Group I (i.e., measuring two cultivation parameters in a cell culture) can be accomplished by growing cells in a conical flask, wherein the said conical flask is fitted with probes to measure certain growth/cultivation parameters (e.g., pH and dissolved oxygen). Similarly, product of invention in Group II for e.g., has numerous materially different uses than those claimed. For e.g., in the manufacture of an antibiotic or an industrially applicable dicarboxylic (e.g., citric) acid.

The inventions discussed above are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches. The search for each one of the above inventions is not coextensive particularly with regard to the literature search. Further, a reference that would anticipate the invention of one group would not necessarily anticipate or even make obvious another group. Finally, the consideration for patentability is different in each case. Thus, it would be an undue burden to examine all of the above inventions in one application.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification (class and subclass), and their recognized diverse subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Kailash C. Srivastava whose telephone number is (703) 605-1196. The examiner can normally be reached on Monday to Thursday from 7:30 A.M. to 6:00 P.M. (Eastern Standard or Daylight Savings Time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn, can be reached on (703) 308-4743 Monday through Thursday. The fax phone number for the organization where this application or proceeding is assigned is (703) 305-3014.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
